Service Schedule

It is a proven fact that regular maintenance makes your dollar go further! We will let you know when a service is coming up so that there is no surprises due to vehicle breakdown.

How to take care of your vehicle to make it last longer:

- Oil changes every **5,000 km***
- Rotate tires every **10,000 km***
- 1 year general check over for safety issues*
- Transmission service - Change fluid and filter every **40,000 km***
- Differential service every **40,000 km***
- Radiator flush every **40,000 km***
- Brake fluid flush every **40,000 km***
- Tune-up (non platinum plugs) - Change sparkplugs every **40,000 km***
- Fuel injection flush every **40,000 km***
- Yearly brake check-up*
- Replace your timing belt every **90,000 to 100,000 km**. This is extremely important on interference engines as belt breakage will cause severe damage to the engine*
- Oxygen sensor should be replaced every **100,000 km***

*or as per manufacturer's recommendations

If you are not sure of what you need - ask us! We are here to help you.
